RIGGING & SLINGING AWARENESS

"THE ART OF ADVENTURE FOR LIFELONG LEARNING"

INTRODUCTION

This training is to provide rigging and slinging operators with necessary skills for moving loads. Properly trained operators will reduce unnecessary damage to the equipment, decrease material and product damage and lessen the chance of an incident or injury.

This comprehensive and intensive course has been developed to address all the applicable Laws and regulations (Factories and Machineries Act 1967) and OSHA 94 for rigging and slinging operators of over-head lifting equipment. The course covers legislated requirements; pre-operational, operational post-operational and lockout requirements; signals; and required inspections. It also covers planning on how to choose the proper rigging tools for common hitches, estimations of loads and rigging the load as per safe and proper handling requirements for lifting loads.

The participants are required to successfully complete a written exam, and are evaluated on their practical knowledge and skills to operate an overhead travelling crane safely.

PROGRAM OBJECTIVE

This course is designed to provide rigging Operators with the minimum industry training requirements to ensure safe and efficient operations. The course focuses on providing the foundation for meeting the basic operational and legal requirements and will actively promote healthy and safe practices for rigging and slinging and understand methodology of accident prevention.

METHODOLOGY

Over two days, participants are required to attend about 14 hours of classroom instructions and active discussions, calculations and a min 4 hours practical evaluation and take a written exam.
